

# R-CAM 1000 XS TECH SPECS

## R-CAM 1000 XS

Portable, dual-view camera for water wells and boreholes.

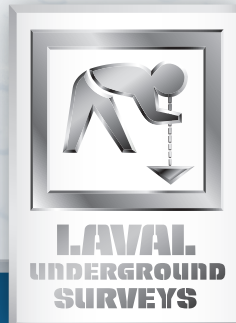

The R-Cam 1000 XS is a portable dual-view, borehole camera system with automated control for either downhole or side-view video profile. Side-view lens includes 360 degree rotation to the right and left with no external moving parts. This camera has effective survey capabilities for 3-inch to 12-inch (7.62-cm to 30.5-cm) well diameters. The R-Cam 1000 well camera system comes equipped with a protective case provided for storage, lighting system, camera, control unit, cable, video monitor, centering bands, DVR, power supply and transport cart for easy maneuvering.
